Level 3

What will I learn?

This course provides practical skills for using AI tools in learning and development. You'll learn how to create lesson plans and learning materials using AI, making training more efficient and engaging. Discover how to develop AI-generated assessments and use AI to provide personalised feedback for learners.

Alongside hands-on experience, you'll also explore the ethical and practical considerations of AI in education and training. By the end of the course, you'll have the

confidence to integrate AI into learning programs effectively while understanding its benefits and limitations.

Perfect for educators, trainers, and L&D professionals looking to innovate!

How will I learn?

Online or face to face, along with online resources to help develop knowledge and skills.

What will I achieve?

Unit accreditation certificate from Agored Cymru Using AI Tools in Learning and Development.
